2006 PWS "Honor Roll" by Jeanine Oakland/Jessica Goldberger

In our spring 2007 issue of the *Northern Flows*, we published the 2005 Honor Roll to recognize those Public Water Systems (PWSs) that stayed "Violation Free" that year. In this issue we bring you the 2006 PWS Honor Roll as our way of saying "Thank You" to the PWS who stayed violation free last year! With the multitude of potential violations under the numerous Safe Drinking Water Act requirements we recognize the dedication it takes to remain violation free for an entire year. Below is a list of the Alaska water systems that did not have any state or federal violations in the 2006 calendar year.

The list is generated from compliance monitoring information in our State database and reflects information that is included in the *Annual Alaska PWS Compliance Report* (ACR) the Drinking Water Program prepares for EPA each year. However, the specifics associated with producing this list is more comprehensive than the ACR since it includes state violations. The list is compiled by looking specifically at when an MCL violation occurred or when monitoring and reporting were supposed to occur. Based on 2006 data, there are 818 PWSs listed on the Honor Roll, or 52 percent of the 1,572 PWSs that were federally regulated in Alaska during the 2006 calendar year.

Congratulations and thanks again to those public water systems that made the Honor Roll! If you're not on the 2006 Honor Roll, check the 2008 summer edition of the newsletter to see if you made the 2007 PWS Honor Roll. If you would like more information on how this list was generated, please call Jeanine Oakland or Jessica Goldberger in the Anchorage office. Their phone numbers are on the back page of this newsletter. Any questions regarding specific violations, please contact your local Drinking Water Program Environmental Program Specialist.
